

# Proposed Topics for Chapter 62-302, F.A.C.

(continued)

- **Want public input on EPA's recommended Selenium criteria**
- **Includes four components**
  - **Fish egg-ovary,**
  - **Fish whole body, and**
  - **30-day average water column concentration, which differ in lakes and streams systems**
  - **Intermittent exposure equation for the water column**
- **Expectation is that States adopt all components, but EPA has not finalized the Implementation Guidance and there are outstanding implementation issues**
