

Proposed Topics for Chapter 62-302, F.A.C.

(continued)

- **Do not intend to change classification of waters, but paragraph 62-302.400(16)(b), F.A.C., was revised in 2013 to limit the boundaries of Class II waters to “predominantly marine waters”**
- **Maps will reflect this change and implement paragraph 62-302.400(16)(a), F.A.C., which states that landward extent of classification is landward extent of waters of the state, which includes wetlands**
- **Will use GIS resources to estimate extent of predominantly marine waters and wetlands**
