

on the gopher tortoise.

As previously stated, consultations with state agencies in the preliminary planning process resulted in additional species of concern being added to the list of targeted species for review at the proposed site. These species do not have federal status but were identified by various resource agencies as being species of special concern. Results of the review of available data, habitat characterization and focused field surveys for other special concern species are presented below the table.

**Table 16: Other Special Concern Species Potentially Occurring in Project Review Area**

Group	Name	State Status	Supporting Habitat in or near the Site
Birds	Bald eagle ( <i>Haliaeetus leucocephalus</i> )	Threatened	Habitat not observed. Species not known to occur.
	Bachman's sparrow ( <i>Peucaea aestivalis</i> )	Rare	Habitat is present. Observed on site in two locations.
Fish	Red face top minnow ( <i>Fundulus rubifrons</i> )	None	Habitat is present. Observed on site.
Flowering Plants	Dwarf pawpaw ( <i>Asimina pygmaea</i> )	None	Habitat is present. Individuals observed on site.
	Florida orange-grass ( <i>Ctenium floridanum</i> )	None	Habitat is present.
	Green-fly orchid ( <i>Epidendrum magnolia</i> )	Unusual	Habitat is present. Was not identified on site.
	Southern umbrella-sedge ( <i>Fuirena scirpoidea</i> )	None	Habitat is present. Individuals observed on site.
	Florida milk-pea ( <i>Galactia floridana</i> )	None	Habitat is present. Was not identified on site.
	Chapman's skeleton grass ( <i>Gymnopogon chapmanianus</i> )	None	Habitat is present. Was not identified on site.
	Narrowleaf water-willow ( <i>Justicia angusta</i> )	None	Habitat is present. Was not identified on site.
	Southern bog-button ( <i>Lachnocaulon beyrichianum</i> )	None	Habitat is present.
	Pond spice ( <i>Litsea aestivalis</i> )	Rare	Habitat is present.
	Odorless bayberry ( <i>Morella inodora</i> )	Threatened	Habitat is present. Was not identified on site.
	Palafoxia ( <i>Palafoxia integrifolia</i> )	None	Habitat is present. Flowers August to November. Surveys will be conducted at that time.
	Arrow arum ( <i>Peltandra sagittifolia</i> )	None	Habitat is present.
	Pennyroyal ( <i>Piloblephis rigida</i> )	None	Habitat is present. Was not identified on site.
	Chapman's fringed orchid ( <i>Platanthera chapmanii</i> )	None	Habitat is present. Flowers July to September. Surveys will be conducted at that time.
	Yellow fringeless orchid ( <i>Platanthera integra</i> )	None	Habitat is present. Flowers July to September. Surveys will be conducted at that time.
Wild coco ( <i>Pteroglossaspis ecristata</i> )	Threatened	Habitat not present.
