

Group	Name	State Status	Supporting Habitat in or near the Site
Flowering Plants	Chapman oak (<i>Quercus chapmanii</i>)	None	Habitat is present. Individuals observed on site.
	Nuttall meadowbeauty (<i>Rhexia nutallia</i>)	None	Habitat is present. Individuals observed on site.
	Fernald's beakrush (<i>Rhynchospora fernaldii</i>)	None	Habitat is present.
	Hooded pitcherplant (<i>Sarracenia minor</i> var. <i>minor</i>)	Unusual	Habitat is present. Individuals observed on site.
	Parrot pitcherplant (<i>Sarracenia psittacine</i>)	Threatened	Habitat is present. Individuals observed on site.
	White sunnybell (<i>Schoenolirion albiflorum</i>)	None	Habitat is present.
	S Sandhill skullcap (<i>Scutellaria arenicola</i>)	None	Habitat is present.
	Florida ladies-tresses (<i>Spiranthes floridana</i>)	None	Habitat is present.
	Wireleaf dropseed (<i>Sporobolus teretifolius</i>)	None	Habitat is present.
	Stokes aster (<i>Stokesia laevis</i>)	None	Habitat is present. Flowers May through September. Surveys will be conducted at that time.
	Sprawling goats' rue (<i>Tephrosia chrysophylla</i>)	None	Habitat is present.
	Bartram's air-plant (<i>Tillandsia bartramii</i>)	None	Habitat is present. Individuals observed on site.
	Diverse-leaf crownbeard (<i>Verbesina heterophylla</i>)	None	Habitat is present.
Mammals	Black bear (<i>Ursus americanus floridanus</i>)	None	Habitat is present. Individuals not observed on site. Individuals observed on Alternate 2 site.
Reptiles	Spotted Turtle (<i>Clemmys guttata</i>)	Unusual	Extremely limited habitat is present on site. Individuals not observed on site.
	Southern hog-nosed snake (<i>Heterodon simus</i>)	Threatened	Extremely limited habitat is present on site. Individuals not observed on site.
	Black swampsnake (<i>Liodytes pygaea</i>)	None	Habitat is present on site. Individuals observed on site.
	Mimic glass lizard (<i>Ophisaurus mimicus</i>)	Rare	Extremely limited habitat is present on site. Individuals not observed on site.
	Florida pine snake (<i>Pituophis melanoleucus</i>)	None	Habitat is present on site. Individuals observed on site.

8.10 Bald eagle

Juvenile bald eagles and non-nesting adults can be seen throughout Georgia, but known nesting activity is concentrated mostly along the coast and near major rivers, wetlands, and reservoirs in the southern and central parts of the state. Like other members of the "fish eagle" group, bald eagles almost always nest near open water. Bald eagle was not observed on the site. Habitat for bald eagle does not occur on site. The proposed project is not likely to have an effect on the bald eagle.
