

# Proposed Revisions to Chapter 62-303, F.A.C.

- **Propose variety of revisions to IWR, with most designed to clarify, but some new provisions:**
  - **Revising the trend test for nutrients and chlorophyll *a***
  - **Revising the acute toxicity threshold for cadmium**
  - **Adding assessment of the proposed turbidity criterion for certain South Florida marine and open coastal waters**
  - **Revisions to streamline the biological health assessments**
  - **Assessment of additional expressions of NNC**
  - **Revisions that incorporate portions of the NNC Implementation Document in the IWR Rule**
  - **Revising the listing methodology for the LVS floral metric**
  - **Revisions related to data uploads to WIN**
  - **Revising text for listings based on FDOH fish consumption advisories**
