

Table 1: Field 13, 24-25, 33, 38-42

Crop	Rooting Depth (inches)	¹ /AWC (inches)	² /MAD (in)	³ /Gross application per irrigation (inches)	Critical Irrigation Period	Operating Time – (hours/day)
Varies, see Table 9	0" - 12"	0.60	0.30	0.35	Varies by crop; See Irrigation Guide, FL Supplement	TBD
	12"-18"	0.30	0.15	0.18		TBD
	18"-24"	0.30	0.15	0.18		TBD
	24" - 36"	0.60	0.30	0.35		TBD

¹ - Available Water Capacity within the 12" root zone (AWC) = 0.05 in/in. Available Water Capacity within the 18" root zone (AWC) = 0.05 in/in. Available Water Capacity within the 24" root zone (AWC) = 0.05 in/in, and Available Water Capacity within the 36" root zone (AWC) = 0.05 in/in.

² - Management Allowed Depletion (MAD) of 50%.

³ - Application depth necessary to replace water used by crop assuming an application efficiency of 85%.
