Reach Name/ID	Reach Location/County	River Basin/ Use	Assessment/ Data Provider	Cause/ Source	Size/Unit	Category/ Priority	Notes
Indian Creek	Headwaters to Jacks Creek	Oconee	Assessment Pending		5	3	EPD believes that our pH probes may have been providing falsely low values at times in 2017 and 2018. Waters that would normally be listed as impaired for low pH are being placed in Category 3 while EPD determines if observed low pH is due to issues with the pH probes; whether low pH may be natural due to low alkalinity; or whether the water is actually impaired for low pH.
GAR030701011011	Walton	Fishing	1,4		Miles		
Indian Creek	Headwaters to Mulberry River (formerly Headwaters to Mulberry Creek)	Oconee	Assessment Pending		7	3	This site has a narrative rank of fair for macroinvertebrates. When EPD completes the reevaluation of the metrics used to assess macroinvertebrate data it will be determined if the macroinvertebrate criteria are being met. The water is in Category 3 for pH. Sonde data was questionable for a couple of months. More data is needed to confirm if a pH issue exists.
GAR030701010210	Jackson, Barrow	Fishing	1,59		Miles		
Jacks Creek	Monroe to Grubby Creek/ D/S abandoned Monroe Jacks Creek Pond	Oconee	Assessment Pending		3	2	The water is supporting its Fishing Use. Data are not available to assess the Drinking Water Use.

Savannah River/Front River	Ebenezer Creek to SR 25	Savannah	Assessment Pending		28	2	FC TMDL drafted 2020. DO is being placed in Category 3. Measured DO was below the daily minimum of 4.0 mg/L 11% of the time. However, the River has a designated use of "Coastal Fishing" where the DO was monitored. The Rules and Regulations acknowledge that waters with a Coastal Fishing use may naturally have DO that does not meet the normal DO criteria. In this case, the DO criteria reverts to "Natural" and up to a 0.1 mg/L deficit from natural is allowed by the Rules. It is not known what the "Natural DO" at this station would have been when DO was recorded below 4.0 mg/L. This section of the River is covered by the 5R dissolved oxygen restoration plan that was put in place for the Savannah Harbor. Implementation of the 5R plan will ensure DO criteria are also met in the River. The water is supporting its Drinking Water Use.
