

Highway 94), this habitat does not exist within the review area. No red-cockaded woodpeckers, cavity trees, or signs were observed during field reconnaissance.

## 5.0 CONCLUSIONS

Within the survey review area, TTL observed 31 gopher tortoise burrows, which are located in close proximity to the railroad rail spur right-of-way. Therefore, potential wintering habitat is present onsite for the eastern indigo snake. No suitable habitat was observed onsite for the frosted flatwoods salamander or the red-cockaded woodpecker.

Due to the historic use of this property as an industrial facility and no proposed construction within burrow areas, this project may affect but is not likely to adversely affect the gopher tortoise or the eastern indigo snake.
