

Designated Uses: Recreation vs. Fishing/Drinking Water

- Fishing and Drinking Water: seasonal bacteria criteria
 - May – October (primary contact recreation criteria):
 - Same criteria as Recreation Designated Use
 - November – April (secondary contact recreation criteria):
 - Enterococci (estuarine waters):
 - Not to exceed 30-day geometric mean of ~~175~~ **98*** counts per 100 mL
 - 10% excursion STV of ~~650~~ **364*** counts per 100 mL in same 30-day interval
 - E. coli (all other waters – freshwater):
 - Not to exceed 30 day geometric mean of ~~630~~ **353*** counts per 100 mL
 - 10% excursion STV of ~~2050~~ **1148*** counts per 100mL in same 30-day interval

* Estimated criterion; collaborating with EPA on final criteria values
