

Stephen Foster Folk Culture Center State Park

Optimum Boundary

Over 250 acres of undeveloped or rural parcels around Stephen Foster Folk Culture Center State Park have been identified as desirable for acquisition (see Optimum Boundary map). This includes a large portion of land between the park and County Road 25A. Parcels north of County Road 25A include land bordering existing park property up to U.S. 41. Property north of the park's south entrance is also included. The acquisition of these lands will add desirable natural resources and will enhance the unit's boundaries for management purposes.

Acquisition of these lands will provide opportunities for expanded public recreation use and will help to maintain an adequate buffer from future private development.
