

appropriate hazardous materials training for LNG equipment prior to the first loading of LNG into the tender during implementation of Phase I.

4. FECR must inform FRA of any abnormal pressure rise in the tender tank, the occurrence of any equipment alarms, or venting events, any accident or incident, or other release of LNG within 24 hours of occurrence. Within 30 calendar days of any such event, FECR must provide FRA a detailed written report identifying the root cause(s) for the occurrence and measures taken to prevent future such events.
5. FECR must provide FRA a report of "out-of-service events" as defined by the original equipment manufacturers within 30 days of any such events.

If there are any additional questions regarding this letter, please contact Mr. Karl Alexy, Staff Director, Hazardous Materials Division, at (b) (6) or John.Alexy@dot.gov.

Sincerely,

Robert C. Lauby  
Associate Administrator for Railroad Safety  
Chief Safety Officer
