

Association of American Railroads (AAR) Loading Capabilities Guide shall be used to select appropriate equipment.

Equipment proposed by FECR for accepting a (b) (4) ISO LNG vessel may be:

- (b) (4)
- 
- 
- 

Under no circumstances will FECR utilize a fully enclosed railcar for the transportation of LNG shipments in (b) (4) ISO containers. Additionally:

- FECR shall require the shipper shall maintain equipment records for the ISO containers detailing maintenance and certification history. Shipper shall also inspect all containers prior to loading.
- Containers shall be inspected in accordance with FECR standard operating practices for Intermodal gates and for hazardous materials upon arrival on FECR property.
- FECR shall ensure the equipment used in the transportation and handling of LNG (e.g., chassis, railcars, and cranes) is in good mechanical order and is inspected prior to operations.
