

attract thousands of spectators with its entertainment, vendors, food, and more. The event takes place at the Bradford County Fairgrounds in the Spring each year.

In addition, Bradford County has recently become host of the Krawl'n for the Fallen event. This event is held at the Keystone Airport and raises awareness and remembrance for fallen Law Enforcement Officers. According to the organizers, *Off Road United*, the 2019 event showcased over 600 registered Jeeps, more than 1500 people in attendance, approximately 58 vendors, and raised a total of \$75,000 (<https://www.offroadunitedfoundation.com/krawl-n-for-the-fallen>).

As events like these as well as others continue to grow, they should be carefully observed and properly planned for.

Current Land Use

The land use patterns are influenced by the waterways and road system. The primary land uses in the area are agricultural, conservation, and forest, all of which are subject to disaster caused by weather phenomenon or wildfires, and consist of wildlife and water management areas, which are ecologically sensitive.

Future Land Use

The Future Land Use Plan Map identifies the classification areas for Bradford County; agricultural, conservation, environmentally sensitive, public, residential, commercial, and industrial.

The map classification identifies that most of the county is agricultural, conservation and public use. The jurisdictions specifics are identified for the Cities of Starke, Lawtey and Hampton, and for the Town of Brooker.

With the overall population growth rate expected to increase over the next five years and in reviewing the specifics on Bradford County's population data, the projected land use for the county will remain predominately agricultural, conservation and public use.

The Bradford County Future Land Use Map can be found by visiting the Bradford County website:
