Valdosta, GA 31601

SCHEDULED

Meeting: 04/10/25 05:30 PM

Department: Engineering

Category: Services

Prepared By: Chelsea Nevels

Initiator: Chelsea Nevels

AGENDA ITEM NO. (ID # 3926)

DOC ID: 3926

Consideration of a request to approve a Professional Design Services Proposal for Utility Rehabilitation and Improvements for the Lakeland Highway Lift Station and the Sanitary Sewer Main Outfall.

BUDGET IMPACT/FUNDING SOURCE: BOND

HISTORY: The Lakeland Highway Lift Station serves a large basin covering the northwestern area of the City. Given the continuing development in this part of the City along with the aging and deteriorating conditions of this Lift Station and downstream force main and gravity main, rehabilitation and upgrade improvements are needed to serve the citizens and the development of the City. Maintaining our infrastructure assets in efficient functional condition is a key function of the City and of our Utility Department.

FACTS AND ISSUES: The City Engineering Staff has completed a conceptual layout for rehabilitating these sewer trunk lines. The next step is design and a Professional Engineering Consultant is required for this work. On an annual basis, the City Engineering Department has developed a list of qualified Professional Services Firms through solicitation of Statements of Qualification for the design of water distribution, sanitary sewer, wastewater collection and treatment, stormwater, sidewalk construction, street revisions, transportation studies, land surveying, and other miscellaneous tasks. The firms in the library can provide Professional Services to the City when the need arises and the firm is available and qualified. LEA is in our 2024/2025 library and is qualified to perform this scope of Design Services.

The scope of work includes an evaluation of the Lakeland
