Re: Authorization to Commence Service of Phase II Facilities

Dear Ms. Connolly:

I grant Sabal Trail Transmission, LLC's (Sabal Trail) April 8, 2020 request to place into service the Sabal Trail Project Phase II Facilities, specifically the Albany and Dunnellon Compressor Stations located respectively in Dougherty County, Georgia and Marion County, Florida. Your request complies with environmental condition 9 of the Federal Energy Regulatory Commission's February 2, 2016 *Order Issuing Certificates and Approving Abandonment* (Order).

Based on our most recent field inspection, Sabal Trail's construction status reports, and the representative photos attached to your request, rehabilitation and restoration of affected areas is proceeding satisfactorily. As stated in your request, Sabal Trail commits to retaining environmental inspection staff, monitoring lands affected by the Phase II Facilities, and addressing any restoration issues, as necessary. It is my expectation that these commitments will be honored and that any restoration issues that should arise will be addressed fully and promptly.
