

Ground cover and park amenities that appear to be at the end of their useful life and should be replaced to enhance the first impression and overall attractiveness of the park

Unimproved, unmaintained, and damaged parking area and boat input ramps that deter from the overall appearance, attractiveness, and use of the park

OPPORTUNITIES

- The first impression and overall attractiveness of many of VLPRAs parks has the potential to be enhanced through comprehensive park improvements, such as the updating, repair, and replacement of aging or damaged landscaping, hardscaping, amenities, and facilities. Chitty Park, Vallotton Big Field, and most of the VLPRAs boat ramps are examples of parks with a first impression and overall attractiveness hindered by hardscaping, landscaping, and park amenities that are in need of repair and replacement. Improving these elements would enhance the overall experience, perceived safety, and use of parks. Improving the frequency of maintenance to the exterior of many of the VLPRAs parks would also enhance the overall first impression and perceived management and stewardship of the parks.
