

Seating with shade could be added to areas surrounding amenities such as this playground in Greer Park to enhance user experience. Seating could be movable to allow users to customize their seating experience and colorful to add vibrancy to the park.

- Seating areas in many of the parks have the potential to be enhanced by adding more seating options, upgrading existing seating amenities, and in certain instances, enhancing the areas surrounding the seating areas. For example, additional seating could be added around the playgrounds in Payton Park and Greer Park. Additional seating could include fixed seating or movable tables and chairs that allow park users to customize their seating areas as they wish. Additionally, some of the seating amenities in Payton Park are showing signs of disrepair and could be upgraded. The landscape areas surrounding the seating areas could also be repaired to be more aesthetically appealing. Lastly, shade trees or shade structures could be installed to improve the comfort of seating areas.

Seating areas with natural or structural shade
