

Table 2. Previously Recorded Archaeological Sites Within 1-km of the Proposed Project Area.				
Site	Components	Site Type	NRHP Status	Recording Entity and Date
9LW57	Precontact	Early Archaic Lithic Scatter	Recommended Ineligible	O'Quinn - 1995
9LW58	Precontact	Middle to Late Archaic Lithic Scatter	Recommended Ineligible	O'Quinn - 1995
9LW59	Precontact	Middle to Late Archaic Lithic Scatter	Recommended Ineligible	O'Quinn - 1995
9LW60	Precontact	Archaic Lithic Scatter	Recommended Ineligible	O'Quinn - 1995
9LW61	Historic	Early 19th-Century Ceramic Scatter	Recommended Ineligible	O'Quinn - 1995
9LW94	Precontact	Unknown Precontact Lithic Scatter	Unknown	Kirkland - 2007
9LW95	Precontact; Historic	Unknown Precontact Ceramic Scatter; Early to Mid 20th-Century Ceramic Scatter	Recommended Ineligible	Kirkland - 2007
9LW96	Precontact	Unknown Precontact Lithic Scatter	Recommended Ineligible	Kirkland - 2007
9LW125	Precontact	Unknown Precontact Lithic Scatter	Recommended Ineligible	Macek - 2014
9LW126	Precontact; Historic	Unknown Precontact Lithic Scatter; Early to Mid 20th-Century Ceramic Scatter	Recommended Ineligible	Macek - 2014

*Site 9LW61.* Site 9LW61, measuring 90-x-60 m, is an early nineteenth-century ceramic scatter documented by Valdosta State University in 1995. The site is located on a terrace overlooking Mud Swamp approximately 600 m southwest of the intersection of Industrial Boulevard and Old Clyattville Road. The site was recommended ineligible for NRHP inclusion (O'Quinn 1995e).

*Site 9LW94.* Site 9LW94, measuring 120 m in length, is an unknown precontact lithic scatter documented by Southeastern Horizons, Inc., in 2007. The site is located on an upland plain approximately 670 m west of Old Clyattville Road. The site's NRHP eligibility is listed as unknown because the site could not be delineated to the east and west due to survey area constraints (Kirkland 2007a).
