**End of Incident:** 02/16/2025 10:00 PM

**Incident Description**

On Sunday, February 16, 2025 at approximately 6 PM, an operator noticed process water overtopping a tailings berm going into an adjacent wetland. Operator immediately stopped the flow by constructing an earthen dam. Environmental was notified at 10:30 PM. We are estimating a volume of 230,000 gallons of water released and are continuing to finalize the volume. Water within the tailing cell, point of entry and downstream locations have been sampled and we will continue to monitor. The sample locations are checked every day per our water quality monitoring program.
