

BRADFORD COUNTY CWPP

UPDATE 2020

ATTACHMENT A

Southern Wildfire Risk Assessment Portal (SouthWRAP)

Summary Report for Bradford County

The Southern Wildfire Risk Assessment Portal (SouthWRAP) is a new tool being used by the Florida Forest Service. The goal: Increases awareness, communication and visualization of risk assessment data. With access to a basic computer and internet connection, the program can provide easy-to-use, consistent and high quality wildfire risk information, which presents a seamless statewide picture of wildfire risk.

Through access and analysis of county data, wildfire mitigation specialists, prevention planners, community leaders and citizens can generate maps and download wildfire risk information that represents specific areas of interest.

The SouthWRAP Professional Viewer allows for analysis of risk and mitigation projects in particular areas or across landscapes, as well as the generation of reports for those areas. The report is designed to enhance agency management plans, by providing maps and charts of WUI, fuel, or fire behavior indices. For purposes of this CWPP, the areas of interest are called Community Protection Zones, or (CPZs).
