

# Water First North Florida (WFNF)

Pipe treated wastewater from Jacksonville into Suwannee Basin?

**It's not dead yet!**

Legislature zeroed \$20 million. *But that does not affect:*

- \$400 million from JEA
- \$125 million from SJRWMD
- \$2.1 million and more from FDEP

12 counties against it!

**You can help.** Meetings, who to call and a petition:

If it's clean enough for drinking, Jacksonville can drink it.

And Jacksonville can drink from the St. Johns River or desalinate seawater.

These and other ways can raise

levels and flows in Suwannee Basin wells, rivers, and springs.
